

# 2019 call by Action Fédératrice « Étoiles » (AFE)

January 15<sup>th</sup>, 2019

The Action Fédératrice « Étoiles » (AFE) calls for proposals for scientific actions. The goal is to promote scientific projects on the theme “Stellar astrophysics” led by teams from Paris Observatory.

The yearly budget of AFE is of the order of 30 k€.

Projects that concern more than one “Actions Fédératrices” (AFs) can be submitted simultaneously to these AFs as an answer to their respective call to request co-funding. In this case, the proposal must specify the synergies and the proposed sharing of the costs between the AFs.

The attached template is to be filled.

**The AFE money can only cover costs related to travels of Observatory members** (to collaborate in another French or foreign institute, or to present the results in a conference), **short-term invitations** of scientists from other French or foreign institutes who collaborate on the project, **work meetings** of the collaboration at the Observatory, and **material** necessary for the project (no personal computers). In particular, the AFE money can support travel or work expenses of a PhD student or postdoc working on an AFE project. The AFE cannot fund salaries (including student internships).

**Proposals of scientific actions should be submitted by email, before February 4<sup>th</sup>, 2019, at 12:00 CET, to [frederic.royer@obspm.fr](mailto:frederic.royer@obspm.fr)**

The AFE will send a reply to the PIs of AFE proposals in the second half of February.
